Work Experience

ZirMed, Louisville, KY
Delivery Manager Intern
August 2015 -present
Assists the Delivery Manager and Engineering teams in validating the project objectives. Plans with Products, Operations and Engineering teams to coordinate the delivery of development and production releases and ensures that quality assurance standards are met using agile methodologies and Scrum. Created reports using Team Foundation Server data warehouse to document and analyzed the development process.

Republic Bank & Trust, Louisville, KY
Business Intelligence Intern
April 2015 - August 2015
Used data to create reports to help make better business decisions for Republic Bank personnel. Wrote SQL code to analyze the data using SQL Server Management Studio. Using the collected analyzed data, I would create reports with SQL Server Reporting Services which would be deployed to SharePoint upon completion.

(TSF) T-Shirt Florida, Louisville, KY
Warehouse Employee
April 2008 - April 2015
Warehouse employee who pulls orders, replenishes stock, performs office duties like using Microsoft Word and Excel, answering the phone and providing customer service, and also helping with some tech issues.
